Step 1: Place lead results in ascending order (from lowest to highest value) with lowest value at # 1, in the table below. Repeat for <i>copper</i> result Please report results that are ND or less than (<) the laboratory's reported detection limit (MDL) as zero. Results at or above the laboratory's detection limit (MDL) but below 0.005 mg/L for lead or 0.05 mg/L for copper shall be reported as measured or may be reported as 0.0025 mg/L for lead or 0.0 mg/L for copper.														detection			
nece	Step 2: Multiply the total number of samples collected by 0.9 (this is your 90 th percentile sample number). Round to the nearest whole number, if necessary.																
	<u>Step 3:</u> Compare the sample result at the 90th percentile sample number against the corresponding action level. If the 90th percentile value is higher than the action level, then you have an exceedance and are required to contact MassDEP as soon as possible for information on compliance actions.																
Note	Note: Do not include school results on this form unless the PWS is a school. Remember, within 30 days of receipt, you must send individual results to the persons served at each sampled location as per 310 CMR 22.06B(6)(c) ¹ .

	My system was required to 20 lead and copper samples. My system collected: 20 lead and copper samples.																
Total # of samples collected: 20 x 0.9 = 18 This number is my system's 90 th percentile sample #.																	
Circle the 90 th percentile sample # for both lead and copper in the table above, and enter the results in the appropriate spaces below.
